Online Investigations: Tools, Tips, & Techniques

As an investigator, you know how important it is to search for, locate, save, and replicate online information relating to all areas of crime. Because web pages and content can quickly appear and vanish, you need to continuously document your findings. Let us show you the latest tools, tips, and techniques that will keep your investigation moving forward. We'll start by teaching you the steps to take to ensure you don't tip off your suspect by leaving a digital footprint during your investigation. You'll also learn advanced Google searching tips and how to use those skills within specific social networking sites like Facebook and Twitter.

What you will learn

This course teaches investigators how to use the Internet to locate information, find linkages between people, and use social networking sites for law enforcement purposes. Course topics include:

- Advanced Google searching
- Using Firefox for investigations, including add-ons and the SEARCH Investigative Toolbar
- The variations and history of social networking
- Using portable applications for investigations
- Facebook profile creation and searching
- Digital officer safety
- Social networking page capture and legal process
- Creating social networking profiles
- Using Twitter, Instagram, and BlueStacks for investigations

Who should attend

This 3-day course is targeted to all investigators who work in high-tech crime, gangs, homicide, vice, property crimes, narcotics, or other details. This course is non-technical in nature, and all investigators—regardless of their technical background—will gain the skills and knowledge they need to enhance their online investigations.

Enrollment in each course is limited to 20 persons.
SEARCH training courses are limited to law enforcement personnel only.
